Australian Smoking Laws:
Federal law bans smoking in all Australian Commonwealth government buildings, public transport, airports and international and domestic flights. Further bans are in place but are governed by individual states. Most Australian states and territories have banned smoking in enclosed public places, particularly workplaces and restaurants.

Australian Voltage:
Australia uses 220-240 voltage with a three flat pin. Battery chargers for digital cameras, laptops and other electrical equipment will display the input range and as long as this is within the 220-240v range it will work with just a socket converter. If not, it is possible to purchase a transformer that will increase or decrease the Australian voltage as necessary.

Dress Code
The dress code for the famil is casual during the day and smart casual for evening activities. We recommend bringing a warm jacket for evenings.

Currency
Although credit cards and ATMs are readily available, it is a good idea to exchange some money for smaller purchases.

Climate
The warmest months are December to February, with an average maximum temperature of 25ºC. The average minimum temperature from June to August is 9ºC. Warmer clothing and enclosed walking shoes/boots are recommended for outdoor activities and sightseeing. Warm jacket suggested for evenings.
