

# VISITOR ATTRACTION SIGNPOSTING FACTSHEET FOR ARCHITECTURAL AND ENGINEERING STRUCTURES

## Architectural and Engineering Structures – Signposting Rationale

By virtue of their size, high level of technological innovation or iconic cultural status, some engineering or architectural structures are regarded as major tourist attractions, e.g. Snowy Mountains Scheme.

Major architectural/engineering structures are only considered for visitor attraction signposting when there are facilities available for tourists to safely view and/or access the structure. In addition, suitable interpretation of the structure should be provided.

## All the following criteria must be met to secure signposting:

- **Established and open**
- **No pre-booking required**
- **Car parking available**
- **Toilets available**
- **Minimum opening hours required**
- **Current brochure or website**
- **Established vantage points**
- **Interpretive/educational material**

## Attraction is established and operating

Signposting is usually only provided when an attraction is established and operating. It is not customary to establish whether signage is eligible before an attraction has opened, as it is difficult to demonstrate that all the criteria has been met. Therefore, it is generally expected that attractions are already operating so a basis for assessment can be established.

## No pre-booking required

It is expected that the attraction operates to a scale and standard that enables them to cater for the demands of casual visitors without the need for pre-booking. This aims to avoid inconvenience and ensure a satisfactory

visitor experience. However, it is accepted that attractions may require pre-booking for coach tours or large groups.

### Adequate car parking facilities

It is essential that adequate car parking is available either on site or within close and convenient proximity to the attraction, particularly in rural areas. In urban areas on-site parking is desirable, but if not feasible, adequate on- or off-street parking needs to be provided within a convenient distance of the attraction. Adequacy of car parking is assessed on a case-by-case basis.

### Publicly available toilets

Attractions are required to provide toilet facilities on site.

### Opening Hours

Visitors have a legitimate expectation that attractions will be open when they see a 'white on brown' sign and decide to visit. If the attraction is unexpectedly closed, it may result in visitor dissatisfaction, which reflects badly not only on the credibility of the attraction but on the tourism industry generally and the NSW Visitor Attraction Signposting program.

Attractions are required to be open for at least five days per week (including both weekend days) for six hours per day and 11 months of the year.

The requirement that attractions be open on both weekend days is to ensure their availability on the days when many recreational trips are undertaken. The five-day per week requirement recognises that, particularly in more remote regions, the volume of trade may not be adequate to support opening every day during the week.

## Opening hours are permanently displayed at the entrance to the property

Attractions must have signs displayed at the public entry points on or near the property boundary to assist visitors to identify the property and indicate the opening hours, days and any seasonal variations in opening times. The sign also indicates to visitors arriving out of hours when they might return to find the structure open. Where an attraction routinely closes for one month of the year, this needs to be displayed on the sign.

## Current brochure and/or website available

Attractions must have a current brochure or website available that indicates opening hours, days and any seasonal variations in opening times, as well as address and contact details. It is also desirable that a map showing the location of the structure and some brief details about the visitor experience are included.

## Established vantage points

The structure can be accessed or viewed from established vantage points.

## Interpretive/educational material

Interpretation should be provided on the significance of the structure, construction process, cost, length of construction, etc. It is also desirable that guided tours are available.

## Further information

If you require further information or assistance regarding applying for Visitor Attraction Signposting, please contact:
